Subject: RE: Inquiry re. Lead & Wildlife

I agree with Ginny's suggestion and I think pointing them to Fish and Wildlife is a good suggestion to point them to. We are in the lead paint program, but I'll ask around and let you know if I get more ideas.

Dave-

I actually worked on some SF sites years ago where we looked at gun range lead impacts to waterfowl and Rick Suggatt and Bart Hoskins supported the ecological risk considerations. Rick has retired but you could reach out to Bart and he could likely point you to some resources.

Subject: Inquiry re. Lead & Wildlife

Hi Dan,

I was contacted by a reporter with Cape Cod Times seeking info on lead impacts on wildlife, especially waterfowl, due to lead that can/has accumulate(d) in pond sediment and elsewhere due to fishing and lead in bullets. Do you have any recommendation for resources on this topic? Mass. Fish and Game maybe? Or DEP? Or is there EPA info that I am just not thinking of?

Best Regards,

Dave
